Got a Smart 3D TV by LG or Panasonic? Be sure to connect it to your network and subscribe to [3DOO](#). Yes, great independent 3D productions are alive and well. Visit the NYSA's new program there called 'Time Travel Theatre'. Support 3D TV today!

NYSA Lecture Series Awards

Holograms by artists are illuminated at the Holographic House in Nolan Park, 12-6pm Saturdays and Sundays. These tantalizing artworks sculpt light into spatial forms, creating uber realistic images as well as abstract lightscapes that play on perception.

The Center for the Holographic Arts is a non-profit organization that supports artist working with holography and brings holographic art to the public.

Entry is Free, with donations appreciated.

Artists currently exhibited:
Dave Battin, Paul Johnson, Gerald Marks, Sam Moree, Martina Mrogonius, Ikuo Nakamura, Ana Maria Nicholson, and Ray Park

Parallax installation: Parallax is a term used to describe the appearance of an objects size from a moving perspective. In this way moving images can create spatial effects. The Holographic Arts Center invited a number of artists to create projection installations that meditate on the concept of parallax and the phyogeographical experience of Governors Island. Installation dates:
June 14: TDA; June 21: Julian Burgess & Aurelia Moser; June 28: Kazuo Taguchi; July 5: Max Clark; July 12: Carlton Bright; July 19: Pete Rogina and Eileen Cohen; July 26: Steve Pavlovsky; August 2: Video Program; August 9: Erik Sanner

Holocenter House is open from 12-6pm Saturday and Sunday

Programming:
Every other Sunday at 2pm, the New York Stereoscopic Association will be arranging a short lecture with hands on experience

- 6/8 3D - Right Between Your Eyes New York Stereoscopic Association
- 6/22 How to Shoot 3D with a 2D Camera New York Stereoscopic Association
- 7/13 3D from the 18th thru the 21st Century New York Stereoscopic Association
- 7/27 The Master of The View-Master New York Stereoscopic Association
- 8/10 Governors Eye Ball New York Stereoscopic Association

Please check holocenter.org for more information.
